U7. PAYPHONE LINE SERVICE

U7.1 GENERAL

- A. Payphone Line Service (PLS) is a class of service furnished to individuals, firms or corporations which permits connection of a customer-provided instrument that is activated by the deposit of coins, cards, tokens or the entry of a customer account number, to the lines of the Company.
- B. PLS will be provided on a dial-tone-first basis to enable end users to dial certain calls without requiring coin deposits, i.e., all emergency calls, local directory assistance, and non-sent-paid calls.
- C. Service will be provided on a two-way basis, except lines for which a specific exemption has been granted by the Tennessee Regulatory Authority.
- D. The Company will provide Payphone Line Service subject to the availability of facilities, where technically feasible and from properly equipped central offices.
- E. General terms and conditions as described in all other sections of this tariff apply, where appropriate, unless otherwise specified in this section.
- F. PLS access lines are standard loop start, two-wire circuits.
- G. A listing in the white page section of the exchange directory may be provided in connection with PLS. The PLS subscriber, however, may choose to have nonpublished telephone numbers for PLS access lines at no additional charge. Additional listings will be at rates specified in Section U6 of this tariff. Although the PLS subscriber is entitled to a directory listing without charge, the PLS client may be listed instead at the rate for an additional listing.
- H. The PLS subscriber is responsible for meeting all federal, state and local statutes as well as the guidelines outlined by the Tennessee Regulatory Authority with respect to the provision of payphones.
- I. Temporary suspension of service (vacation disconnect), as described in Section U2 of this tariff, is not available for Payphone Line Service. (M)

U7. PAYPHONE LINE SERVICE

U7.2 LIABILITY

(M)

- A. The Company shall not be liable for any losses or damages of any kind resulting from the unavailability or failure of its equipment or facilities; or for any act, omission or failure of performance by the Company, its employees or agents in connection with this tariff. The Company shall not be responsible for incomplete calls or calls that cannot be completed as a result of end user action, subscriber equipment and facilities or Company equipment and facilities.
- B. The Company shall not be liable for shortages of coins collected and deposited at the customer's equipment. The limit of the Company's liability for end user fraud of whatever nature occurring at or in association with the customer's equipment shall be governed by provisions of this tariff and rule or regulation of the Tennessee Regulatory Authority. In case of a conflict, the rule or regulation will prevail.

U7.3 COIN CONTROL SERVICE

- A. Coin control service is available as an optional service for use in conjunction with Payphone Line Service. Coin control service is based on a central office platform which offers features for use with coinless or coin operated (payphone) telephone service. Coin control service uses a software-driven system to provide features and capabilities similar to those provided by micro-processor based, "smart", payphone sets.
- B. Coin control service provides the following features:
 - 1. Coin control for collection, return, and recognition - monitors signals from the payphone to identify when coins are deposited. This feature identifies the status of the attempted call and sends a signal to the payphone to collect the coins when the call is completed or return the coins when the call is not completed.
 - 2. Originating line screening - alerts the operator and interexchange carrier systems that the call is originating from a PLS line and may require special handling and billing treatment.
- C. Such functions as announcements used with payphone telephone service and pre-prompting for additional coin deposits for overtime periods of conversation time are provided in conjunction with Operator-Handling Differentials (Section U18) and Operator Assisted Local Calls (Section U3); appropriate charges will apply when these functions are required.

(M1)

U7.4 ANSWER SUPERVISION SERVICE

- A. Answer Supervision Service is available as an optional service for use in conjunction with Payphone Line Service. It is furnished only from central offices equipped to provide this service and is provided subject to the availability of facilities.
- B. Answer Supervision Service provides "off-hook" supervisory signals to the payphone line for transmission to the customer's location.
